The Be-Tech Digital Safe range combines the most advanced digital technology and material to provide:

**Immediate access to valuable using keypad/PIN/iButton/RFID technology**

Be-Tech Digital Safes widen the range of your valuables. You can now protect those valuables that you usually leave out in the open, including credit cards or those items that are meaningful and unique to you, such as personal diaries, love letters and more.

**Access valuables in the dark**

This digital safe range offers an easy-read backlit display and extra-bright LED interior lighting to give you convenient access to your valuables in a Completely dark environment.

**The widest variety of models and sizes**

Be-Tech leads the way with advanced technology and a wide range of models and sizes. A special option allows recharging of electronic equipment while stored inside the safe, another special options allows supplying power of safe by AC/DC adapter instead of battery power supply. All models are fully modular so that smart safes can be upgraded or parts replaced at minimal cost in the future.

## Who needs a Be-Tech safe?

Everyone has personal valuables that need protecting: jewelry, passport, insurance and medical plans, cameras, prescriptions, heirlooms, photographs, checkbooks and more. Be-Tech Smart Safes provide a single convenient place for these personal items. Valuables safely stored away can easily be found again. The benefits are double: peace of mind plus quick to find.

## How to choose a Smart Safe?

The Be-Tech Smart Safe was designed with consumer in mind. Safes function with one hand, and swing open easily. Simple operation does not require a series of complicated steps. Be-Tech Smart Safes are housed in sturdy steel casing with no sharp corners. Audio feedback on each procedure provides assistance for users with visual impairment. The display panel is large and clear.

## Why Choose Be-Tech Smart Safe?

Be-Tech has been a name to be trusted in the security industry for over twenty years. Over 800,000 Be-Tech Smart Safes are installed in over 50 countries, some of smart safes have been worked for at least ten years but still working well.

The Be-Tech Smart Safes contain all the features to make it the most user-friendly secure safes for seniors, students, office, residence, geracomium and more. Be-Tech Smart Safes provide the emergent power supply and mechanical key override features on the market, the smart safe can be opened in case of batteries run down or safe fail.

Fashion Safes

## The Fashion personal code touchpad safe

The Fashion personal code touchpad safe are equipped with a unique digital security touchpad unlike any other on the market. A scramble number input enables personal codes to be hidden within longer sequences of numbers, whilst additional access RFID key can be set for frequent use or "Dual Authentication" use, ensuring privacy no matter who is in the room when accessing your safe. Simply put these work of art digitalized safes in your home will make you cool and worthy of your confidence.

## Fitting in to fashionable homes

Consumer research shows that people want safes for a handy size and blend-able colour scheme. This is especially important for the growing numbers of individuals living in smaller, even studio, homes, where space is at a premium. Research also shows that, where possible, most people prefer their safes to be bolted to the floor, or to the wardrobe wall. All our safes take these facts into account. All security safes are fully-lined to further protect their contents.

Because safes are most often hidden in dark corners, we've also included a more intuitive LED screen that lights up when you're entering your PIN, and a bright interior light that comes on when you open the door.

Premium Safes

## The Premium personal code plus smart key safe

The Premium Safe is easy to use. LED display and buzzer provide feedback for safe operation. The Premium Safe has its own "key" – a light weight electronic key button that unlocks the safe with a single touch. This smart key can be carried on a key chain, in a pocket or in a purse. Just touch the key button to the large recessed button on the safe panel to unlock. If misplaced, lost, or stolen, the key can be replaced with not need to replace any safe parts, saving money, time, and headaches.

The Premium Safe also contains the feature of "Dual Authentication". It should be touch the key button to the large recessed button on safe panel and input the correct personal code to unlock. With the "Dual Authentication" feature, it will enhance the security level and consumer's confidence.

## User friendly, user faithful

You open your safe using a code you choose yourself, so it's easier to remember and it's just as easy to re-set. When you enter your secret user code, the motorized bolts withdraw and the door opens automatically.

To override the electronic locks, the safe can always be opened through the high-security six lever lock with a double-bitted high security mechanical key.
